Full power for solar and smart energy

Exhibit, inform, profit

Focusing on the power of the sun: solar

The Energy@GET NORD area is all about renewable energies. One of the brand-new key topics for 2026: solar energy.

- **Photovoltaics:** manufacturers of PV systems and components – from solar cells and modules to inverters, mounting systems and wallboxes
- **Solar thermal energy:** manufacturers of solar thermal systems and components
- **Energy storage solutions:** providers of energy storage solutions
- **Integrative solar architecture:** roofs, façades etc.
- **Smart grid technologies:** everything connected with smart grids for the energy transition

Bundled intelligence: smart energy

Also new in the Energy@GET NORD 2026 area: the second focus topic of smart energy.

- **Energy management:** providers of systems for monitoring, controlling and optimising energy consumption in buildings and companies
- **Smart metering:** solutions for consumption recording and billing – from meters to digital billing models
- **Network expansion:** infrastructure and technologies for an efficient, stable electricity grid of the future
- **Charging infrastructure (e-mobility):** manufacturers and providers of charging solutions and control systems – incl. §14a-compliant integration

- ✓ The top topics for 2026: solar and smart energy
- ✓ The opportunity for exhibitors from the solar and energy sectors: present your innovative products and services!
- ✓ Also in 2026: exciting presentations on innovations and trends in the industry!
